Natural Science Major

2018 - 2021

Experience

PROJECTS

SPMB IT Del Website Re-Built

Work in a team of 6 with scrum development methodologies. Focused on Facilities and Announcement page, I conceptualized UI design of the website and work with others team UI designer and front-end programmer. Besides UI/UX Designs, I also took part in manual and automation testing using Katalon and Testrail with 20+ test cases. This website re-build took 7 sprints (14 week) to be done. Beside HTML, CSS, and JavaScript, We also use Laravel (php) as the website framework.

Key Achievement:

- Brainstormed and conceptualized website's interface
- Develop a website using HTML, CSS, JavaScript and Laravel as the framework
- Resolved 20+ test cases in automation and manual testing
- Understanding and implemented scrum methodologies
- Made a scrum documentation on Coda.io

Personal Portfolios Website

Develop a portfolio website for my personal use using HTML, CSS, JavaScript, and Laravel as the framework.

Key Achievement:

- Brainstormed and conceptualized website's interface
- Develop a website using HTML, CSS and JavaScript
- Created admin panel with CRUD (Create, Update, Delete) using Laravel framework

IT Del's Online Library Website (OLIS) Re-designed

Conceptualized home page of IT Del's online library by doing usability test to users and illustrated it on figma. Analyzed and summarized every issues on a document before pouring ideas into designs.

Key Achievement:

- Analyzed usability heuristic of IT Del's Online Library Website and made the document report
- Done two (2) user interviews and conceptualized the question list
- Re-design OLIS page using figma
